customer

PK	customer_id	SERIAL
	first_name	VARCHAR(150)
	last_name	VARCHAR(150)
	billing_info	VARCHAR(150)

tickets

PK	ticket_id	SERIAL
	movie_title	VARCHAR(150)
	movie_date	date

concessions

PK	order_id	SERIAL
	food_type	VARCHAR(150)
	order_price	numeric(8,2)

movies

FK	movie_title	VARCHAR(150)
	movie_time	time
	movie_date	date
	theater	numeric(8,2)

order

PK	order_id	SERIAL
	total_cost	numeric(10,2)
	purchase_date	DATE(current Date)
	ticket_id	SERIAL

rationale:
customer is a unique attribute that is
directly linked to ticket buying, which is
directly linked to movies. Movies and their
attributes are not unique, making them
one-to-many. Both concessions and
movies can be ordered; tickets can also be
part of an order, but linked through movies.
Order ids and ticket ids are unique
attributes.
